

Which HPE Storage is right for you?

HPE MSA

Affordability

Essential data services including crash consistent snapshots. Best for SAS and basic Fibre Channel topologies. Fast performance for predictable workloads.

Nimble Storage

Simplicity

Robust always-on data services with simple config and order. Built-in app aware snaps and replication including measured 6-nines uptime across the entire install base. Customer installable upgrades with fully automated support. Gartner leader for all flash and hybrid storage arrays. HPE InfoSight paves the way for autonomous infrastructure, predicting and preventing problems before they can affect your business.

SimpliVity

Efficiency

Hyperconverged server and storage with always-on deduplication and compression. Native backup and recovery that is purpose built for virtualized workloads.

HPE 3PAR

Tier-1 Flexibility

Highly configurable, multi-node, multi-tenant + 8 array federation. App protection ecosystem; 6-nines, multi-site HA, zero RPO/RTO. Fully composable from HPE Synergy and ONEview.
