

# A Single Source for Your Multivendor Data Center Environment - IBM IMS

IBM Integrated Multivendor Support (IMS) for your Data Center is a service designed to expand the life of your non-IBM server, storage and networking equipment while helping to optimize system availability, reduce costs and reduce IT complexity.

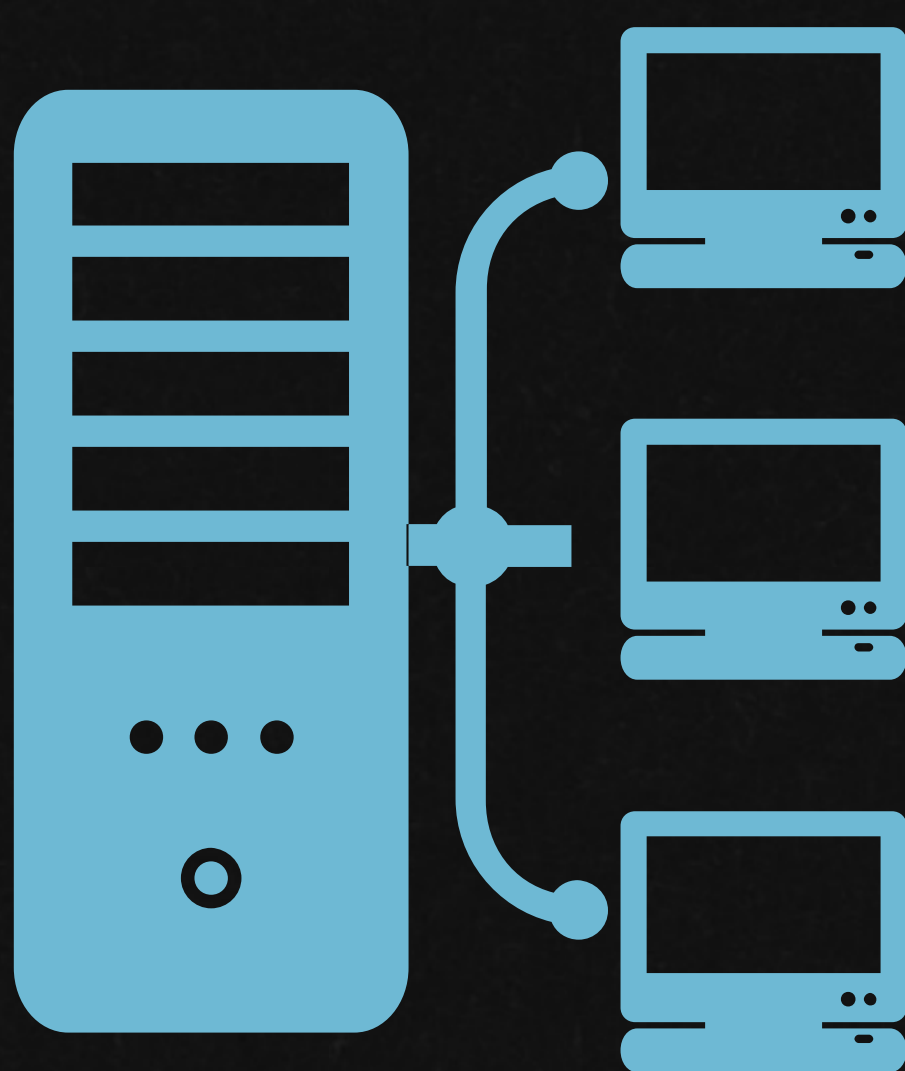

**Make Support Easy With One Contact.**

There is one number to call whenever you need us and one team focused on your needs.

**Extend Your Equipment's Life.**

Optimize the longevity of your equipment while enabling more predictable and consistent budgeting.

**Improve Reliability.**

IT management can be a burden. Allow your staff to concentrate on critical business initiatives and innovation.

**Enhance Scalability**

As-a-Service style offerings provide more visibility into IT support costs - allowing for more informed business decisions and investments.
